

# Algae-Powered Aquaponic Recreational Truck

# Our Mission...

Is a fully self-sufficient system, powered by algae-based biofuel.

The first recreational vehicle that includes a full aquaponics growing system to farm and reap agricultural and aquacultural produce.

The van like of tomorrow

# From Home to Nature Independent & Interdependent

Declining environmental systems and public health from on-the-grid living causes people to feel stuck and stressed in their everyday lives.

What can we do?

Apart is a self-sufficient recreational truck designed for eco-conscious enthusiasts seeking an off-grid or clean energy lifestyle with O environmental impact. It features an integrated aquaponics system that provides fresh food through a symbiotic ecosystem of fish and plants, while algae grow beds on the roof produce biofuel to power all systems with sub-zero emissions. This vehicle fosters a sustainable community focused on both physical and mental well-being.

## Minimum Viable Product

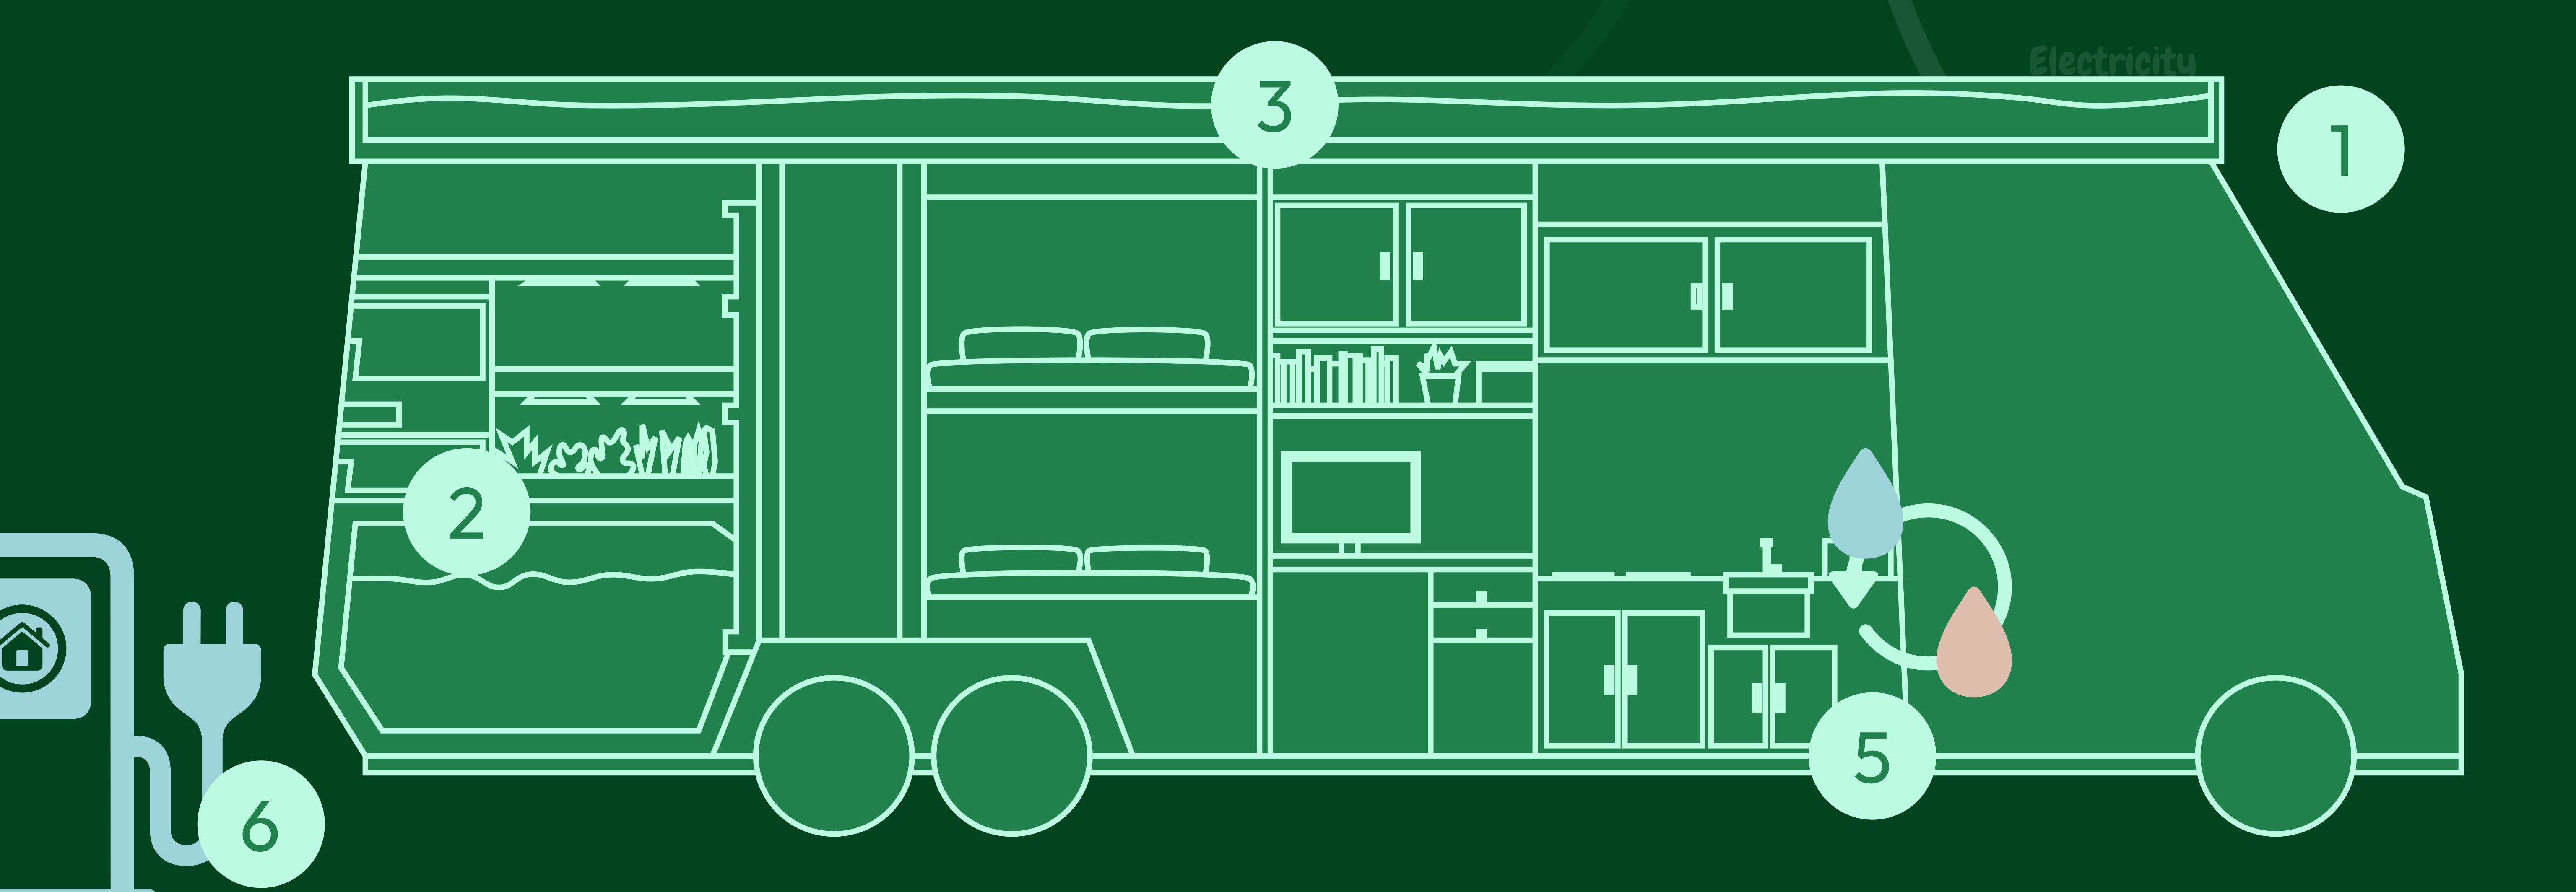

- 1. Mobile Recreational Vehicle
- 2. Integrated Aquaponics Food Production System
- 3. Algae-based Biofuel Technology

## Minimum Viable Product +

4. "Apart-Together" Shared Community

5. Graywater Recycling System

6. Alternative Home Powering System
